TECHNICAL SKILLS

- **Languages:** C++, C, Java, Python, TypeScript, JavaScript, HTML5, CSS3, SQL
- **Frameworks/Libraries:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, Vite, Zustand, Context API, Prisma ORM, JWT, REST APIs, WebSockets, NumPy, Pandas, Matplotlib, Bootstrap
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, SQL Plus
- **Developer Tools & Platforms:** Git, GitHub, Docker, TurboRepo, Firebase, Vercel, Android Studio, VS Code, Google Colab
- **Core CS Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, System Design, Microservices Architecture, Event-Driven Architecture

WORK EXPERIENCE

Full Stack Developer – Jspiders

apr 2025 – apr 2026

- Developed scalable full-stack web applications using React.js, Next.js, Node.js, and TypeScript while following clean architecture and production-grade coding practices.
- Built and maintained REST APIs, authentication systems, and reusable frontend components, improving overall application performance and maintainability.
- Worked on containerized development workflows using Docker and collaborated on deployment pipelines and scalable backend services.
- Contributed to system design discussions, microservices-based architectures, and real-time application features using WebSockets and event-driven patterns.

PROJECTS

QuickShow - Online Movie Ticket Booking Platform 🎬

- Built a full-stack movie ticket booking platform supporting real-time seat availability and booking workflows for 500+ concurrent users.
- Designed a seat-locking mechanism that prevented double-booking and improved booking consistency by 99% during high-traffic scenarios.
- Integrated Stripe payment workflows with webhook validation, automated notifications, and instant booking confirmations for seamless transaction processing.
- Led development of an admin dashboard for movie scheduling, booking management, seat occupancy tracking, and cancellation workflows.
- **Tech Stack:** React, Vite, Node.js, Express.js, MongoDB, Stripe, TMDB API, JWT, Nodemailer, Inngeist, Clerk, GitHub

Veltrix - Real-Time Crypto Trading Platform 📈

- Architected and built a production-grade cryptocurrency trading platform inspired by modern exchange systems, delivering responsive trading workflows and real-time market tracking.
- Designed a scalable microservices architecture with dedicated services for authentication, API gateway management, trading engines, and WebSocket communication.
- Engineered a low-latency order matching engine and real-time order book capable of processing 10,000+ events/sec using event-driven architecture and WebSocket streaming.
- Owned core trading responsibilities including authentication workflows, market switching, TradingView integration, Redis communication, and application state management.
- **Tech Stack:** Next.js, React, TypeScript, Node.js, Express.js, WebSockets, Redis, PostgreSQL, Prisma ORM, Zustand, Docker, JWT, Tailwind CSS, TradingView, TurboRepo, GitHub

EDUCATION

Odisha University of Technology and Research

B.Tech in Computer Science and Engineering (CGPA: 8.57)

Bhubaneswar, India

2021–2025
